Halloween Coloring Contest:

Grab a coloring page at your next appointment! Prizes will be gift cards of the winners' choosing.

Introducing U-Lab Aligners:

These clear aligners offer a budget friendly treatment for small tooth movements.

Happy Birthday!:

Don't forget to wish our team members with September and October birthdays a happy birthday!: Tonya, Madison and Jennifer!

Today's Tip:

Is your child getting food caught in their expander? Stop by Walgreens or CVS and grab a bulb syringe. Rinsing with warm pressurized water will help keep their expander clean!

Questions for The Doc:

Q: I lost my retainer and my tooth moved. Do I need braces again?

A: Usually, minor tooth movements that happen after you lose a retainer are correctable without a full orthodontic treatment. If you notice one of your teeth has moved and would like to re-align it before getting a new retainer, ask about U-Lab. It is an affordable clear aligner option!
